

FILIP

GRAPHIC DESIGN STUDENT

Im a student and really interested in design overall. My journey through design learning has gone from animation, to videography and finally land on graphic design.

Another way to look at my life is a furious gamer, DJ that makes you move through the night, and a very, very, very BIG lover of house animals. Dogs are bomb.

My expertise in work enviroment is mainly in the communcation way. Of course, design and work on computer is good, always can learn more, but you can count on me. On the other hand, I love to talk to people, love to present. The way I can make people like what I show just gives me a different kind of boost.
